

# Unfolding a smart green life.

Friendly amenities,  
innovative facilities and  
strategic location.

Top notch expertise in design and planning has created an inspiring environment for healthy living. The cutting edge amenities and facilities are bound to inspire the young and old alike. The smart eco-friendly features incorporated in the layout, some of them for the first time in Bengaluru, are bound to make life just that much more meaningful. Also, the location of the project at Devanahalli makes it eminently accessible and convenient.

For those who value nature's resplendence and its varied gifts, Merusri Springs is a Green Paradise. With the rare to find luxury of large open spaces, this layout brings to you exclusive residential villa plots encompassing the joy of warm community living in a lush and eco friendly setting.

Smart environment management:

- ◆ Use of solar energy
- ◆ Efficient water recycling
- ◆ Eco friendly waste management
- ◆ Extensive tree plantation for green cover

Live streaming cameras have been integrated at the township, so that you can view your property at any time and from any where.

Efficient property management system:

Our assistance is available to all our customers for the below mentioned activities.

- Payment of property tax
- Getting Encumbrance Certificate
- Khata transfer
- Legal and finance assistance
- Architecture services / Building plan approval
- Construction

Watch the  
Sun rising  
every day ...  
and choose  
to make it  
a happy day.

## Smart use of solar energy.

- ◆ Energy efficient landscape lighting.
- ◆ 50% of street lights will be on the solar power grid, resulting in saving 50% on the net consumption.
- ◆ Use of energy efficient, new generation LED street lights which result in 60% saving of the total power consumption on street lighting.
- ◆ 24 hours power back up for avenue lights.

At Merusri Springs,  
we believe in harnessing  
the power of the Sun for  
a brighter tomorrow.

## FIRST TIME IN BANGALORE

Timer based drip irrigation system - which enables efficient water management.

- ◆ Supplies the right quantum of water to plants.
- ◆ Reduces motor running and distribution system cost
- ◆ Saves 10% of power cost
- ◆ Saves 21,000 litres of water per day (in 5 acres).

We believe in giving our children a green future.

### ECOFRIENDLY WATER RECYCLING

- ◆ Rainwater harvesting to trap every drop for reuse
- ◆ Separate pipe lines installed to collect grey water and black water
- ◆ Separate treatment of grey water and black water
- ◆ Treated waste water used for gardening and landscaping. Hence no ground water drawn for irrigation

### SMART WASTE MANAGEMENT

- ◆ Effluent waste management system
  - ◆ Segregation of wet waste at source
  - ◆ Waste treatment plant for processing wet waste wherein the by-product is compost.
- Composting:**
- ◆ Which enriches the soil
  - ◆ Restrains plant diseases and pests
  - ◆ Reduces the need for chemical fertilizers
  - ◆ Encourages the production of beneficial bacteria
  - ◆ Reduces methane emissions and lowers the carbon footprint
  - ◆ Reduces pressure on landfills

Enjoy the feel of fresh air on your face and a soft wind blowing through your hair.

## INNOVATIVE LANDSCAPING

Our team of expert landscaping consultants have put in their best to create an inspiring environment for healthy living. Rejuvenation through a bit of indulgence in the beautifully landscaped gardens may well be the right recipe for your good health. The enveloping lush landscapes in the township are a refreshing sight.

### Landscaping features

- ◆ Two beautiful parks
- ◆ Aesthetic avenue plantation
- ◆ Plantation of medicinal and aromatic plants
- ◆ Use of plants that augment air quality and oxygen levels
