1. The first step is to identify the problem or question that needs to be addressed. This involves understanding the context and the specific requirements of the task.

12

1. The first group of respondents (10%) was made up of people who had been in the country for less than 10 years. This group was the least educated, with 40% having only a high school diploma or less. They were also the least likely to be employed, with only 30% of this group having a job. The majority of this group (60%) was female, and the majority (70%) was born in the United States.
