The architectural floor plan shows a symmetrical building layout with a central vertical core. The core contains a staircase with dimensions $T=0.25$ and $R=0.166$, and an overhead tank (O/H TANK) at the top. The building has five floors above the parking floor, plus a basement floor. The rooms are arranged as follows:

- TERRACE FLOOR:** A large terrace area at the top of the building.
- FIFTH FLOOR:** Contains two bedrooms, two toilets, and two balconies. The balconies are labeled "BALCONY 5.00x10.00M".
- FOURTH FLOOR:** Contains two bedrooms, two toilets, and two balconies. The balconies are labeled "BALCONY 5.00x10.00M".
- THIRD FLOOR:** Contains two bedrooms, two toilets, and two balconies. The balconies are labeled "BALCONY 5.00x10.00M".
- SECOND FLOOR:** Contains two bedrooms, two toilets, and two balconies. The balconies are labeled "BALCONY 5.00x10.00M".
- FIRST FLOOR:** Contains two bedrooms, two toilets, and two balconies. The balconies are labeled "BALCONY 5.00x10.00M".
- PARKING FLOOR:** A floor below the first floor, likely for vehicle parking.
- BASEMENT FLOOR:** The lowest floor, containing a driver room and a toilet.

The central core also includes a driver room and a toilet on the basement floor. The plan includes various dimensions for rooms and corridors, and a central staircase with dimensions $T=0.25$ and $R=0.166$.
