1. The first step in the design process is to determine the overall dimensions of the building. This is done by measuring the site and determining the setbacks and other local regulations. The second step is to determine the building's footprint and the location of the main entrance. The third step is to determine the building's height and the location of the roof. The fourth step is to determine the building's internal layout and the location of the rooms. The fifth step is to determine the building's external features and the location of the landscaping. The sixth step is to determine the building's construction details and the location of the materials. The seventh step is to determine the building's cost and the location of the budget. The eighth step is to determine the building's schedule and the location of the timeline. The ninth step is to determine the building's quality and the location of the standards. The tenth step is to determine the building's safety and the location of the codes. The eleventh step is to determine the building's sustainability and the location of the goals. The twelfth step is to determine the building's accessibility and the location of the laws. The thirteenth step is to determine the building's security and the location of the measures. The fourteenth step is to determine the building's energy efficiency and the location of the programs. The fifteenth step is to determine the building's water conservation and the location of the practices. The sixteenth step is to determine the building's waste management and the location of the plans. The seventeenth step is to determine the building's indoor air quality and the location of the standards. The eighteenth step is to determine the building's outdoor air quality and the location of the measures. The nineteenth step is to determine the building's noise control and the location of the standards. The twentieth step is to determine the building's vibration control and the location of the measures. The twenty-first step is to determine the building's fire safety and the location of the codes. The twenty-second step is to determine the building's earthquake safety and the location of the codes. The twenty-third step is to determine the building's wind safety and the location of the codes. The twenty-fourth step is to determine the building's flood safety and the location of the codes. The twenty-fifth step is to determine the building's pest control and the location of the measures. The twenty-sixth step is to determine the building's mold control and the location of the measures. The twenty-seventh step is to determine the building's asbestos control and the location of the measures. The twenty-eighth step is to determine the building's lead control and the location of the measures. The twenty-ninth step is to determine the building's radon control and the location of the measures. The thirtieth step is to determine the building's overall quality and the location of the standards.
