Block	Proposed Built-up Area	Required 10% Mortgage area	Provided Mortgage area(In Sq.mts)	Total Built up Area (In Sq.mts)
--------------	-------------------------------	-----------------------------------	--	--

PROPOSED (AMPHI THEATRE)	1,386.35	138.64	0.00	1,395.01
PROPOSED (AMENITIES)	12,324.71	1,232.47	1,266.16	14,592.92
PROPOSED (TOWER B)	50,535.49	5,053.55	3,063.28	154,141.76
PROPOSED (TOWER F)	65,345.26	6,534.53	3,857.04	67,542.62
PROPOSED (TOWER A)	65,404.00	6,540.40	3,927.74	67,612.82
Total	194,995.81	19,499.59	12,114.22	305,285.13

The Building Permission is sanctioned subject to following conditions:

GENERAL CONDITIONS FOR COMPLIANCE: -

- a) The building plans technically approved are valid for period of (3) years in case of non high rise buildings and (5) years in case of high rise buildings from date of issue of this letter if the work is commenced within the six months from the date of issue.
- b) With regard to water supply, drainage and sewerage disposal system to be provided / facilitated to the proposed building and shall comply the following: -
 - i. The location of water supply source & sewerage disposal source are located at appropriate distance within the site preferably at 100 feet distance so as to avoid contamination.
 - ii. The depth of the bore and sizes shall be limited to the minimum depth and size of existing nearby bore-well. Water shall be disinfected by adding hypo-solution to maintain 0.3 to 0.4 p.m. of residual chlorine in the sump / overhead tanks.
 - iii. Where main Gram Panchayat drains exist in vicinity of site, insist on connecting the treated sewerage to main existing drain by laying a sewer pipe of diameter ranging from 200mm. To 300mm.
 - iv. In case where such Gram Panchayat drain exist, insist on connecting the treated sewerage overflow to a natural drain or nala with a sewer pipe of diameter 150mm.
 - v. Before allowing the overflow mentioned in (iii) & (iv) above ensure the sewerage of the proposed building is invariably 1st into a common septic tank constructed on as per ISI standard specification (ISI) Code No.2470 of 1985 (Annexure - I) and constructed with a fixed contact bed, duly covered and ventilated for primary treatment. The Executive Authority shall ensure that no effluent / drainage over flows on the road or public place.
 - vi. To prevent chokage of sewers / drains, the last inspection chamber within the site / premises shall be provided with safety pads / gates.
 - vii. The party should clean that septic tank periodically by themselves, and cart way the sludge, etc., to an unobjectionable place.
 - viii. Since eventually the public sewerage and water supply systems are expected to be systematically added / extended by the Hyderabad Metropolitan Water Supply & Sewerage Board to the outlying areas of Hyderabad, the proposed building owners shall pay proportionate pro-rata charges to Hyderabad Metropolitan Water Supply & Sewerage board for the above facilities as and when demanded by the Hyderabad Water Supply & Sewerage Board.
 - ix. Structural Safety and Fire Safety Requirements shall be the responsibility of the Owner, Builder/ Developer, Architect and St. Engineer to provide all necessary Fire Fighting installations as stipulated in National Building Code of India, 2005 like;
 - a. To provide one entry and one exit to the premises with a minimum width of 4.5mts. and height clearance of 5mts.
 - b. Provide Fire resistant swing door for the collapsible lifts in all floors.
 - c. Provide Generator, as alternate source of electric supply.
 - d. Emergency Lighting in the Corridor / Common passages and stair case.
 - e. Two numbers water type fire extinguishers for every 600 Sq.mts. of floor area with minimum of four numbers fire extinguishers per floor and 5k DCP extinguishers minimum 2 Nos. each at Generator and Transformer area shall be provided as per I.S.I. specification No.2190-1992.
 - f. Manually operated and alarm system in the entire buildings;
 - g. Separate Underground static water storage tank capacity of 25, 000 lts. Capacity.
 - h. Separate Terrace Tank of 25,000 lts. Capacity for Residential buildings.
 - i. Hose Reel, Down Corner.
 - j. Automatic Sprinkler system is to be provided if the basement area exceeds 200 Sq.mts.
 - k. Electrical Wiring and installation shall be certified by the electrical engineers to ensure electrical fire safety.
 - l. Transformers shall be protected with 4 hours rating fire resist constructions.
 - m. To create a joint open space with the neighbors building / premises for maneuverability of fire vehicles. No parking or any constructions shall be made in setbacks area.
- c) The proposed building / complex shall be constructed strictly as per the technically approved building plans and

mandatory inspection shall be made at foundation stage, plinth level and first floor and subsequent floor level as required under G.O.Ms.No.168 MA, dt.07-04-2012. Any deviations, misuse or violations of minimum setbacks, common parking floor / stilt marking / violation and other balcony projections shall not be allowed.

- d) The proposed building complex to be occupied used or otherwise let out etc., only after;
- (i) The proposed building is completed in accordance with the technically approved building plans;
 - (ii) After ensuring all the above conditions **at (a) to (c)** are complied.
 - (iii) After ensuring the conditions with regard to water supply and sewerage disposal system as mentioned in (d) above are compiled to the satisfaction of the Municipal Corporation/Municipality.
 - (iv) After issuing a "Fit for Occupancy" certificate by the HMDA as required under Building rules.
- e) The developer shall display a board at a prominent place at the site which shall show the plan and specify the conditions mentioned by this office letter, so as to facilitate public in the matter.
- f) That the applicant is responsible for structural safety and the safety requirement in accordance with the National Building Code.
- g) If construction is not commenced within 6 months from the date of proceedings, the applicant shall submit afresh application duly paying required fees.
- h) If greenery is not maintained 10% additional property tax shall be imposed as penalty every year till the condition is fulfilled.
- i) The vehicles carrying construction material and debris of any kind shall be cleaned before it is permitted to ply on the road after unloading such material.
- j) The Owner/builder shall strictly comply with the directions contained in the order of NATIONAL GREEN TRIBUNAL as well as the Ministry of Environment and Forests (MoEF) Guidelines, 2010 while raising construction.
- k) The applicant shall develop Rain Water harvesting structures in the site under reference as per Norms.
- l) That the applicant should erect temporary scheme to avoid spilling of materials outside the plot during construction to stop environmental pollution to ensure safety and security of the pedestrians and neighbours.
- m) That the applicant shall made provisions for erection of Transformer and Garbage house with in the premises.
- n) That the applicant / builder / constructor / developer shall not keep their construction materials / debris on public road.
- o) That the applicant should ensure to submit a compliance report to HMDA soon after completion of first floor roof level and then all the roofs are laid so as to enable to permit him to proceed further.
- p) That the stilt / Cellar should be exclusively use for parking for vehicles without any partition walls and Rolling shutters and the same should not be converted or the undertaking dated.
- q) That the construction should be made strictly in accordance with this sanctioned plan. If any modifications are necessary prior approval should be obtained.
- r) This permission does not bar any public agency including HMDA to acquire the lands for public purpose as per law.
- s) Tree plantation shall be done along the periphery and also in front of the premises as per T.S. Water Land and Trees Rules 2002 and create sustainable green buildings that make use of vertical gardens.
- t) The applicant shall make provision for recycling of rain water.
- u) The applicant shall install CC cameras from safety point of view of the residents.
- v) The applicant shall adopt the mandatory and prescriptive requirements listed under ECBC.
- w) The roofing shall be designed to reflect more sunlight and absorb less heat than standard roof/Cool roofing.
- x) The applicant shall register the project in TG RERA if applicable.
- y) In respect of All Non Residential Buildings and Residential Building in plot of 500 Sq.mts / 600 Sq.Yds and above, the Applicant shall comply with the provision of Telangana State Cool Roof Policy 2023-2028 and the same is mandatory for issuance of Occupancy Certificate(OC).
- z) A dual piping system is a type of plumbing system where two separate sets of pipes are installed to distribute water in a building. One set of pipes carries potable or drinking water, while the other set of pipes carries non-potable or reclaimed water. The potable water pipes are connected to the main water supply and distribute water for drinking, cooking, and bathing. The non-potable or reclaimed water pipes carry water that has been treated and recycled from sources like rainwater, greywater from sinks and showers, or treated wastewater.
- aa) Parking places in buildings shall be provided with Electric Vehicle Charging Infrastructure as per Central Electricity Authority (CEA) Technical Requirements for Connection of Distributed Generation Sources, CEA Measures of Safety Regulations, 2010 and Ministry of Power Consolidated Guidelines and Standards for EV Charging Infrastructure, as amended from time to time".
- ab) For Constructions over 10,000 Sq.mt and above and in case of Group Housing Buildings where there are 100 units and above, the plumbing arrangement shall be made in a way that the potable water shall be used for drinking, cooking and bathing only and for rest of the uses, provision for dual piping system shall be made.
- ac) New building constructions shall have to properly demarcate sections within buildings and on rooftops for housing Broadband/digital connectivity infrastructure / antenna. These areas should have access to power supply for reliable, always on services. Further, Computer Telephony Integration (CTI) of a building shall include the common duct to access the common space used as telecomn room inside the building.
- ad) Occupancy Certificate to a building shall be granted only after ensuring that the CTI as per the prescribed standards is in place and an undertaking is given by the Architect or Engineer certifying that building has ensured common access to all digital infrastructure to all Service providers in accordance with plan of creation of CTI.
