AFFIDAVIT

WE LIFE INFRA ENGINEERS INDIA LLP, represented by Yendamuri Sonar Bharat (aged 39), is currently developing a project entitled "LIFE BRINDAVANAM." This project is located on Jajpur Road, Mouza Sobara, Khata No. 372/1324, Plot No. 1385, encompassing an area of 0.40 dec. We are pleased to convey that this initiative has received official approval from the Vyasa Nagar Municipality.

According to the Record of Rights (ROR), the original land measurement is recorded as 1,619 square meters. However, upon submission for plan approval, the site measurement was determined to be 1,471.65 square meters. This difference of 147.35 square meters results earlier formation of road and drainage formations undertaken by the Vyasa Nagar Municipality, which were designated for this area. Additionally, in response to a request from local authorities concerning a new road widening initiative, we are required to provide a gift deed for 278.65 square meters, and we agreed to hand over the land to the authorities, as noted in the plan approval letter No: BP/VSNI/012333.

Consequently, the net plot area is now assessed at 1,193.00 square meters. Under the applicable regulations, we have designed our building project to comply with this net plot area and have received approval for the construction of a multiple-story residential building (S+5).
